

Dear Client

During June, we are holding a Vaccination Initiative to help our cat owners get their pets' vaccinations up-to-date.

It is vitally important to vaccinate animals to protect them against debilitating and potentially fatal diseases. Without regular vaccinations your pet is at risk.

As part of this great offer, we will provide a health check for your pet and offer you a complete primary course of vaccination for the price of a booster.

In order to participate in the Vaccination Initiative, cats should not have been vaccinated for at least 18 months and must be at least 18 months old.

If your pets' vaccinations need to be brought up-to-date, please contact us to arrange an appointment and bring this letter along with you when you come to the practice.

Please don't delay, as the Vaccination Initiative runs until the end of June 2009 only.

We look forward to seeing you soon.

Yours sincerely
